

Actifoam

BPIR Declaration

Version: V1-08/23

Designated building product: Class 1

Declaration

Beele Australasia Ltd has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

Product/system

Name	Actifoam
Line	Fire retardant closed cell foam rubber
Identifier	Actifoam

Description

Actifoam rubber is a fire retardant closed cell foam rubber. Used in conjunction with Nofirno rubber sleeves and/or Rise /Crusher wrap to create sealed fire penetrations for pipework and cabling between wall and floors.

Benefits: High level of fire resistance Thermal protection Low surface temperature under fire
Remains mechanically intact Easily cut for field applications Non Fibrous - no mineral wool
Excellent resistance against weathering, UV and ozone Age tested to 50+ years Lowest smoke
and toxicity material

Practical Applications: Temporary fire-resistant sealing of penetration openings during
construction work in (ACTIFOAM Temporary Seals) Fire resistant sealing of doors and hatches
Sealing of gaps in any type of construction environment Perfect for application in critical vehicle
and mass transit tunnel areas Fire resistant ducting of busbar systems Permanent cable / cable
tray firestop penetrations

Scope of use

For use in walls and floors. All building types. All locations.

Conditions of use

To be used as a system and compatible with other Beele Engineering products designed for
various applications. Nofirno sleeves, Rise sleeves, Crusher wrap, Nofirno board, Fyllofys
board, Fyllofoam. Installation procedures to be adhered to as per Beele installation manuals and
videos. Available on : www.beele.co.nz www.beele.com.au Resources tab, product manuals,
Videos, SDS, BPIR.

Relevant building code clauses

Contributions to compliance

In accordance with AS4072.1-2005 and AS1530.4-2005 C/AS2 Clauses C1-C6
